Migration

Due to the inefficiency of the past GreenWaves token the team decided to migrate the contract. The change was to a zero fee based standard ERC20 Token contract, because the old contract was wasting fee's on each transaction due to it being poorly designed. We have successfully reduced the cost of a transaction from 0.45-0.55\$/ Transaction to 0.03-0.15\$. This alligns perfectly with the vision of the GreenWAVES token, due to its low cost, high security measures.

Security Measures

Pre-Audited Standard DxMint Token - [AUDIT REPORT](#)

KYC verification still apply from the old contract address.

**Old Contract*

**Audit at March 20, 2024 with a Static analysis, and a manual review by FusionTech. Found 0 vulnerability, and successfully passed the audit with a score of maximum security.*

Utility

The Utility of GreenWAVES is covering the future of the Ecommerce with a Peer-To-Peer crypto payment platform. GreenWAVES offers a complete payment and shop platform for everyone, with an easy-to-use, comprehensive crypto payments platform for any business or individual. The system manages the payment process from start to finish, but does not get involved in any transactions, rather uses a completely different system to earn a small (0.08%) of fee's on its usage through a credit system. This credit system offers a free 125\$ Sales budget for every user, and until that 125\$ budget isn't met the user does not have to top up their balance to sell. 10\$ of top up is equal to 1250\$ of Sales budget. Learn more at grvv.app

Goals

Long term goals include populating the GreenWAVES Payments DApp, entering the TOP 100 Cryptocurrency by Marketcap, and Tier 1 and 2 exchange listings. Our short term goals is to spread as much awareness as possible and reach as most users as possible through online and offline marketing.

Marketing Strategy

Community Building & Education

News articles, Press Releases including but not limited to only: Yahoo News, Yahoo Finance, Google News, Digital Journal, MarketWatch, Bloomberg, Benzinga...

Guerilla Marketing

Real Life marketing, around the globe in over 180 countries through our members.

Influencer Marketing

We know some investors only invest based on what their favourite influencer says, thus we will approach a lot of high ROI influencers with real numbers.

Twitter Shillings, AMA's, Reddit Shilling, Telegram shilling, call channels, AMA's.

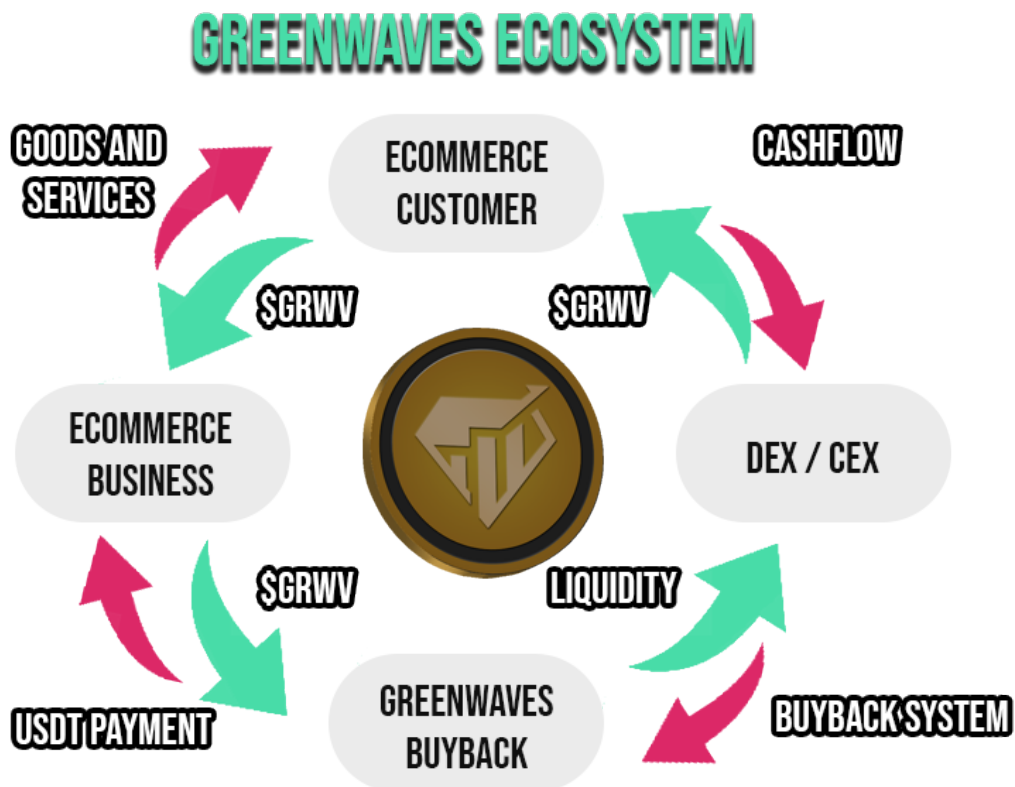

Token Economy

Buy/Sell/Transfer Tax: 0%
Contract Renounce: DONE - [LINK](#)

Ecosystem

The GreenWAVES Ecosystem is an ever growing and developing ecosystem. The token 'GreenWAVES' (\$GRWV) is used as a form of currency in the world of GreenWAVES. By using the \$GRWV tokens users of the services will be earning benefits of what GreenWAVES has to offer, which is also growing, and is not limited to a few small perks.

*GreenWAVES BuyBack: Series of shops built by the GreenWAVES Team which uses its revenue to: Buy back GreenWAVES tokens from Ecommerce shops, Provide Liquidity and fund marketing or development related projects.
